## Data Import (“Importación de Datos”)

### Data Import Screen

This is not a standard screen on which the client, period and campaign for which the External Loading files are being imported are shown. If there is more than one file, they should be loaded one by one. The screen will report on the progress of the importation of Formato (Format), Composición (Composition), Compuesto (Compound), Ventas (Sales), Unidades No-SIG (No-SIG Unit) and Anexo Extranjeros / Foreign Companies Annex files.

**Carga de Datos**

**Datos de cliente / campaña / periodo**

Cliente: 99999 - CLIENTE EJEMPLO ECOSOFT 2009

Campaña: 2009

Periodo: Declaración Definitiva 2008 y Declaración Provisional 2009

Formatos:

Composición:

Compuesto:

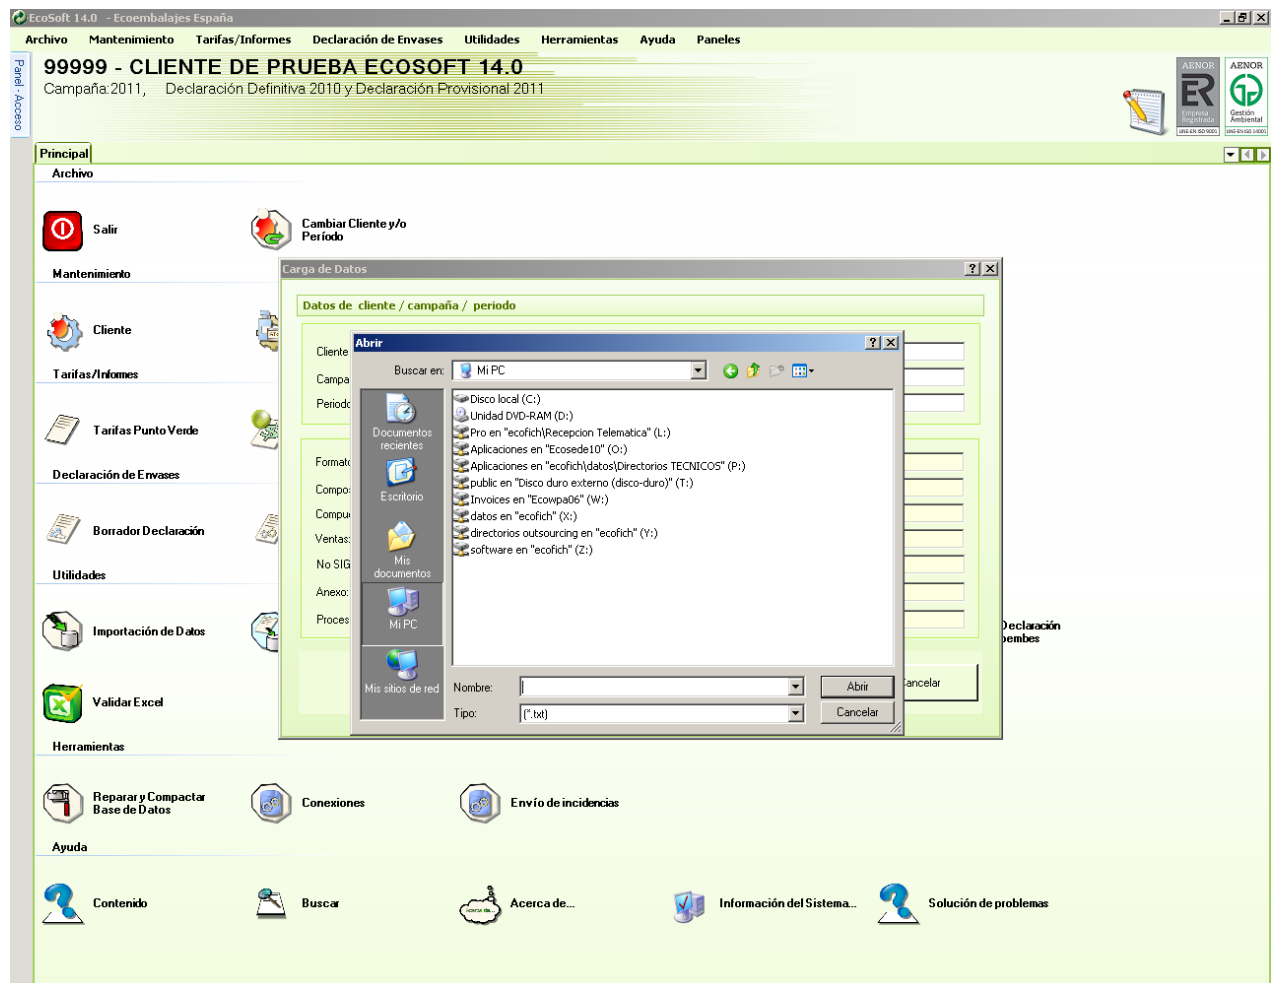

Ventas:

No SIG:

Anexo:

Proceso:

When the “Cargar Datos” (Load Data) button is clicked, a file explorer window appears in order to locate the external loading files to import.

## Process Description

To introduce format, composition and sales information en masse in Ecosoft for the Packaging Declaration, you should follow the steps listed below:

1. Install the Packaging Declaration Software as specified in the Installation Manual (If you have previously generated a packaging declaration with the Ecosoft application, you should make sure that it was with the updated 14.0 version. If it is not, you must update the application).
2. Enter basic company data through the application (trade name, Company Fiscal Number, address, contact person, marketed brands, declaration data, etc.).
3. Carry out the loading of data en masse using Ecosoft's Utilidades > Importación de Datos (Data Import Functions).
4. Once the data has been introduced, the application will begin, starting with a global validation process that will detect possible inconsistencies that the uncontrolled introduction of data might have generated. If you'd like more information, consult the [Validaciones](#) section of the application's online help.

5. When the detected errors have been corrected by the validation process, the application will proceed with the generation of the annual packaging declaration that is to be sent to Ecoembes as explained in the [Declaration Generation](#) section of the application's online help.

## Structure of External Loading File for Import

The files will have a "TXT" extension. The different types of tables will be marked with @Table Type, and the separating character between fields is the semicolon ";". The structure of these files is:

### @Table Type

**Field Name1;Field Name2;Field Name3;....**  
**Field Value1;Field Value 2;Field Value 3;...**

This data can be stored in one or more files, as long as the structure is maintained. If you have several data files, they must be imported one by one using the Ecoembes application.

When creating the files, you must be aware of the configuration character that separates decimals on the PC with which you are going to work. These characters are the period "." or the comma "," and they are used to separate the integer from the decimal. External Loading files imported by Ecosoft should use the decimal separator established in said PC's configuration.

The structure of the External Loading file tables is explained in the Table Structure of the External Loading File for Import section.

## Table Structure of the External Loading File for Import

The types of table possible for External Loading files are explained below. Files can be generated and imported by Ecosoft, and it is not necessary for said files to have all of the types of table. However, you should keep in mind the following restrictions:

- If more than one type of table is going to be imported, you should respect the order detailed below.
- If composition tables are imported, they should refer to format codes that already exist in Ecosoft for that client or that were previously established in that same file.
- If compound tables are imported, they should refer to composition codes that exist in Ecosoft for that client or that were previously established in that same file.
- If sales tables are imported, they should refer to format codes that exist in Ecosoft for that client or that were previously established in that same file.
- If prevention tables are imported, they should refer to format codes that exist in Ecosoft for that client or that were previously established in that same file.

The following is a list of the types of tables and their structures. For all table definitions, the following will be taken into account:

- In the Tamaño Máximo (Maximum Size) column, when the type is Text or Number, the maximum size of the field will be specified.

- In the Tamaño Máximo (Maximum Size) column, when the type is Decimal Number, it will be recorded as (n,m) in which case n is the maximum total number of digits and m the number of decimal places reserved.
- In the Tamaño Máximo (Maximum Size) column, when the type is Fecha (Date), the format will be specified.
- In the Oblig column the check ✓ appears when the field is required. If said column is empty, it is an optional field, so one of the two following options applies:
  - Maintain said field in the line where the names of the different fields of the corresponding section are listed. To show that you do not want to include information, you do not have to include a character or blank space, just use the separating character “;” in the detail lines to make clear that the field doesn’t have a value.
  - Eliminate said field from the line where the names of the different fields of the corresponding section are listed. Then it is no longer necessary to indicate anything (character, blank space or the separating character “;”) in the detail lines.
- In the Validar (Validate) column, required values and optional values will be separated by a slash “/”. When it is a Master code, it will be specified in that field. We recommend that you consult the [Importation Master Tables](#) section to find out what values are allowed in said fields.

### ➤ Anexo (Annex)

Annex tables contain data from the Anexo Extranjeros / Foreign Companies Annex. This type of table will only be filled out by foreign companies that declare products in the name of Spanish importers. The table will include data on these Spanish clients broken down by client and brand supplied, which cannot in any case be a Spanish brand (for example a distribution brand).

Field	Description	Type	Max Size	Oblig	Validate
Razon	Spanish client's Trade Name.	Text	100	✓	
Direccion	Spanish client's complete address.	Text	100		
CIF	Spanish client's CIF/NIF (Company Fiscal Number).	Text	9	✓	
Marca	Commercial brand of the product whose packaging is being declared.	Text	200	✓	
Unidades Min	Sales units of a specific brand for the period in question.	Whole Number	13		
Ventas	Sales total in euros of a specific brand for the period in question.	Decimal Number	(15)		

### ➤ Formato (Format)

Format tables contain the different Packaging Formats (SIG or no SIG) that the company markets. One change made to the register structure in Ecosoft 14 is the increase of the reference field to 20 positions.

Field	Description	Type	Max Size	Oblig.	Validate
 CodFormato	Packaging format code that identifies it unequivocally.	Whole Number	15	✓	
Descripción	Description of the format	Text	50	✓	
Referencia	Optional field. Internal code assigned by the company to a Packaging Format.	Text	20	✓	
TipoProducto	Type of product contained in the Packaging Format.	Text	4	✓	[Producto] CodProducto
PesoProducto	Weight of the product contained in the Packaging Format (grams).	Decimal Number	(15,2)	✓	
FechaAlta	Date the Format came into use.	Date	dd/mm/yyyy		
FechaBaja	Date the Packaging Format becomes invalid.	Date	dd/mm/yyyy		
Sig	Format defined as SIG or NO SIG	Text	1	✓	S/N

### ➤ Composición (Composition)

Composition tables contain each and every element that makes up the packaging Formats defined in the previous tables. Compositions with compound packaging elements (“Compuesto” [Compound] field with a value of -1), the material and sub-material assigned to the element corresponding to the material/sub-material that makes up the majority of the packaging element, according to the application criteria for the Green Dot tariff, approved by the Ecoembes commission in July 2003. Therefore, for compound elements, the element weight (“gramos” [grams] field), will be the total weight of the packaging element.

Field	Description	Type	Max Size	Oblig.	Validate
ComerIndus	Packaging type indicator (Domestic, Commercial, Industrial).	Texto	1 (D,C, I)	✓	
 IdComposicion	Composition identifier.	Entero	15	✓	
CodMaterial	Code of the material for which the packaging element contributes. If it is a compound, it will be completed in the validation process (contributing material).	Texto	2	✓	[Material] CodMaterial
CodSubMaterial	Code of the sub-material for which the packaging element contributes. If it is a compound, it will be completed in the validation process (contributing material).	Texto	2	✓	[Submaterial] CodSubmaterial
Gramos	Weight in grams of the element. If a compound, the validation process will include the sum of the weight of the materials that make up the compound.	Número decimal	(14,2)	✓	
Cubicos	Volume in milliliters contained by the packaging format element.	Número decimal	(14,2)	Para Vidrio	
CodFormato	Format Code of the packaging of which the element is a part.	Número Entero	15	✓	[Formato] CodFormato

Field	Description	Type	Max Size	Oblig.	Validate
UnidadesEnvase	Number of units of the Element contained in one Packaging Format.	Número decimal	(17,5)	✓	
TipoEnvase	Packaging type code to which the element belongs. Contained in table: "Envase" (Packaging).	Texto	4	✓	[Envase] CodEnvase
Compuesto	Indicates that the packaging element is a compound and therefore the materials definition is found on the "Compuesto" (Compound) table	Número Entero	1	✓	-1/0 según si es compuesto o no

➤ Compuestos (Compounds)

These tables describe the Materials in a composition that make up a compound element, those with a value of -1 in the "Compuesto" (Compound) field.

Field	Description	Type	Max Size	Oblig.	Validate
IdComposicion	Composition Identifier	Whole Number	15	✓	[Composicion]. IdComposicion
CodMaterial	Material Code	Text	2	✓	[Material] CodMaterial
CodSubMaterial	Sub-material Code	Text	2	✓	[Submaterial] CodSubmaterial
Peso	Element weight in grams	Decimal Number	(14,2)	✓	

➤ Ventas (Sales)

These tables contain the format units defined as SIG and organized by period placed on the market.

Field	Description	Type	Max Size	Oblig.	Validate
NumPeriodo	Period in which sales are made.	Whole Number	2	✓	20/22/24/26 depending on whether you are dealing with Definitive Declarations from 2007/2008/2009/ or Definitive 2010 and Provisional 2011
CodFormato	<b>SIG</b> Format Code for the Packaging to which the element belongs.	Whole Number	15	✓	[Formato] CodFormato
Venta	Format units placed on the Spanish market	Whole Number	12		
Exportacion	Packaging Format units exported or sent to other EU Countries during the period.	Whole Number	12		
Importacion	Packaging Format units imported from or acquired in other EU Countries during the period.	Whole Number	12		

➤ Prevención (Prevention)

Tables with units of Formats not Adherent to the SIG, used to create Prevention Business Plans and/or to inform the Autonomous Communities.

Field	Description	Type	Max Size	Oblig.	Validate
NumPeriodo	Period in which the sales are made.	Whole Number	2	✓	20/22/24/26 depending on whether you are dealing with Definitive Declarations from 2007/2008/2009 or Definitive 2010 and Provisional 2011
CodFormato	<b>No SIG</b> Format Code for the Packaging to which the element belongs.	Whole Number	15	✓	[Formato] CodFormato
NoSig	Format units not covered by the SIG.	Whole Number	11		
Reutilizable	Reusable format units placed on the market.	Whole Number	11		
Rotaciones	Number of annual cycles for reusable packaging.	Whole Number	11		
Vida	Average life span of reusable packaging in months.	Whole Number	11		

To find valid product, packaging, material and sub-material codes, consult the [Importation Master Tables](#) section.

➤ Examples of the Structure of a file using a comma “,” for decimal separation:

**Section @FORMATO – Examples**

**@FORMATO**

CodFormato;Descripcion;Referencia;TipoProducto;PesoProducto;FechaAlta;FechaBaja;Sig

25;Lata refresco 500 cc;;3001;500;15/12/1998;;S

10;Botella 1,5 L Refresco;;3001;1500;15/12/1998;;S

26;Botellín refresco 25 cl;;3001;250;15/12/1998;;N

**NOTE: In this structure the names of all of the fields that make up the file have been listed in the corresponding line. However, as the user does not wish to include information on the “FechaBaja” (Cancellation Date), in the detail lines in the corresponding position only “;” is indicated.**

**@FORMATO**

CodFormato;Descripcion;Referencia;TipoProducto;PesoProducto;FechaAlta; Sig

25;Lata refresco 500 cc;;3001;500;15/12/1998;S

10;Botella 1,5 L Refresco;;3001;1500;15/12/1998;S

26;Botellín refresco 25 cl;;3001;250;15/12/1998;N

**NOTE: In this structure the names of all of the fields that make up the file have been listed in the corresponding line, except for “FechaBaja” (Cancellation Date), for which the user does not wish to include information in any of the detail lines of this section. For this reason, the separating carácter “;” is not indicated in the detail lines in the position originally occupied by this field.**

**@FORMATO**

CodFormato;Descripcion;Referencia;TipoProducto;PesoProducto;Sig

31;Bolsa frutos secos bolsillo;12; 1201; 125;S

32;Estuche caramelos;13; 0701;125;S

33;Tetra brick 25 cl zumo;14;3002;250;N

**NOTE:** In this structure only the names of the required fields that make up the file have been listed in the corresponding line.

#### **Section @COMPOSICION – Examples**

##### **@COMPOSICION**

ComerIndus;IdComposicion;CodMaterial;CodSubmaterial;Gramos;Cubicos;CodFormato;UnidadesEnvase;TipoEnvase;Compuesto

D;98;01;05;11,6;0;28;1;116;0

D;99;01;01;28,9;0;28;1;115;-1

C;91;07;00;85;250;26;1;101;0

**NOTE:** In this structure the names of all of the fields that make up the file are listed in the corresponding line, as all of them are required. For those compositions with materials different from glass, the “Cubicos” (Cubic) field should be marked “0.”

#### **Section @COMPUESTO – Examples**

##### **@COMPUESTO**

IdComposicion;CodMaterial;CodSubmaterial;Peso

99;01;01;20,8

99;01;04;6,1

99;01;05;2

**NOTE:** In this structure the names of all of the fields that make up the file are listed in the corresponding line, as all of them are required.

#### **Section @VENTA – Examples**

##### **@VENTA**

NumPeriodo;CodFormato;Venta;Exportacion;Importacion

26;10;650000;;1000

26;25;125000;70000;

**NOTE:** En this structure the names of all of the fields that make up the file are listed in the corresponding line. When information doesn't have to be included in the “Venta” (Sale), “Exportacion” (Export) or “Importacion” (Import) fields, only “;” should be indicated in the corresponding position of the detail lines.

##### **@VENTA**

NumPeriodo;CodFormato;Venta

26;25;380000

26;10;380000

26;31;260000

**NOTE:** In this structure the names of all of the required fields (“NumPeriodo” and “CodFormato”) and the only field for which the user wanted to provide information (“Venta” [Sale]) have been listed in the corresponding line.

#### **Section @PREVENCION – Examples**

##### **@PREVENCION**

NumPeriodo;CodFormato;NoSig;Reutilizable;Rotaciones;Vida

26;26;650000;;;;

**NOTE:** In this structure the names of all of the fields that make up the file are listed in the corresponding line. When information does not have to be included in the “NoSig,” “Reutilizable” (Reusable), “Rotaciones” (Rotations) and “Vida” (Life) fields, only “;” has to be indicated in the corresponding position in the detail lines.

**@PREVENCION**

NumPeriodo;CodFormato;NoSig;Reutilizable;Rotaciones;Vida

26;26;650000

**NOTE:** In this structure the names of all of the required fields (“NumPeriodo” and “CodFormato”) and the only field for which the user wanted to provide information (“NoSig”) have been listed in the corresponding line.

**Section @ANEXO – Examples**

@ANEXO

Razon;Direccion;CIF;Marca;UnidadesMin;Ventas

SOCIEDAD DE PRUEBAS;C/ Pruebas, s/n;00000000H;MARCA;1;1000

**NOTE:** En In this structure the names of all of the fields that make up the file are listed in the corresponding line. When information does not have to be included in the “UnidadesMin” or “Ventas”(Sales) field, only “;”has to be indicated in the corresponding position in the detail lines.

@ANEXO

Razon;Direccion;CIF;Marca;Ventas

SOCIEDAD DE PRUEBAS;C/ Pruebas, s/n;00000000H;MARCA;1000

**NOTE:** In this structure the names of the three required fields (“Razon” [Company Name], “Direccion” [Address] and “Marca” [Brand]) and the only field for which the user wanted to provide information (“Venta” [Sale]) have been listed in the corresponding line.

---

## Import Master Tables

When data is imported to Ecosoft through flat file, external file or Excel files, it is necessary to understand the meaning of the master codes by which we define a format-composition.

### ➤ Materials Master Table

Material Code MATER_ID	Material Description MATER_DS	Material Description (ENG)
01	PLASTICOS	Plastics
02	PAPEL/CARTON	Paper / Cardboard
04	METALES	Metals
05	MADERA/CORCHO	Wood / Cork
07	VIDRIO	Glass
09	CARTÓN BEB./ALIM. (BRICK)	Cardboard for beverages and foods (carton-type packaging)
10	CERAMICA	Ceramic
11	OTROS	Others

### ➤ Sub-materials Master Table

Sub-materials are a sub-group of materials for which the material code also appears. When the sub-material doesn't have a description, apply the material description. For example, material code 11, OTROS (OTHER).

Sub-material Code SUBMA_ID	Material Code MATER_ID	SUBMA_DS	Sub-material Description (ENG)
01	01	PET	PET
02	01	HDPE Flexible	HDPE (Flexible Body)
03	01	PVC	PVC
04	01	OTROS	Others
05	01	LDPE	LDPE
06	01	HDPE Cuerpo Rígido y bolsa UNE	HDPE (Rigid Body and Reusable bag –UNE standard)
00	02		
40	04	ACERO	Steel
41	04	ALUMINIO	Aluminium
00	05		
00	07		
00	09		
00	10		
00	11		

➤ **Products Master Table**

Products depend on the sector, which is why the Sector code appears. For the description of the sector to which the product belongs, consult the Sectors Master Table.

PRODU_ID	PRODU_DS	Description	SECAN_ID
0100	Panadería, bollería industrial y galletas	Industry baking of bread or buns	008
0302	Café, achicoria, malta	Coffee, chicory, malt	021
0401	Preparados en polvo de cacao y similares para beber	Powdered preparations of drinking cocoa and the like	021
