

Manual de Instalación

Installation Manual

Packaging Declaration

Version 15.2

October 2011

Before beginning

Read the instructions contained in this Installation Manual carefully. If you would like to ask us any questions you may request more information from our Ecoembes Customer Service Line: 902-28-10-28

1. Before running the installation program, CLOSE all Windows programs you have open.
2. If an error occurs during the upgrade, close it and contact the Customer Service Line at the number indicated above.
3. The automatic installation program will detect whether the "Ecoembes 12.X," "Ecoembes 13.X" and "Ecoembes 14.X" software was installed, also asking you if you wish to update the Databases found. If it does not find any Databases on any of the PC's units, or if you uninstalled the previous version, the program will assume that it is a new installation.
4. It is recommended that you restart your PC once the installation or update has finalized, or if the installer suggests that you do so.

Requirements to install the application

Hardware

- PC with Pentium or similar drive, or at least 1 GB of RAM and 512 MB of free hard drive space on the system.
- On 64-bit architectures, at least 2GB of RAM and 512 MB of available space.
- The application will not function properly if installed on a system which is carrying out server tasks.

Software

- Microsoft Windows XP sp3, Windows Vista sp2 x 32 and x 64 bits, Windows 7 x 32 and x 64 bits.
- Monitor resolution adaptation: 1024 * 768 for screens of 15" and 17", 1080 x 1024 for screens of 19", 1280 x 768 or 1280 x 800 for panoramic and/or laptop screens. For 15" and 17" screens check that the font type selected is normal.

Beginning the installation

Introduce the CD-ROM into your PC's drive. Selection the option for the 2012 Declaration and the updating program will start right up.

Installation

When starting up the installation program, you will see the following screen:

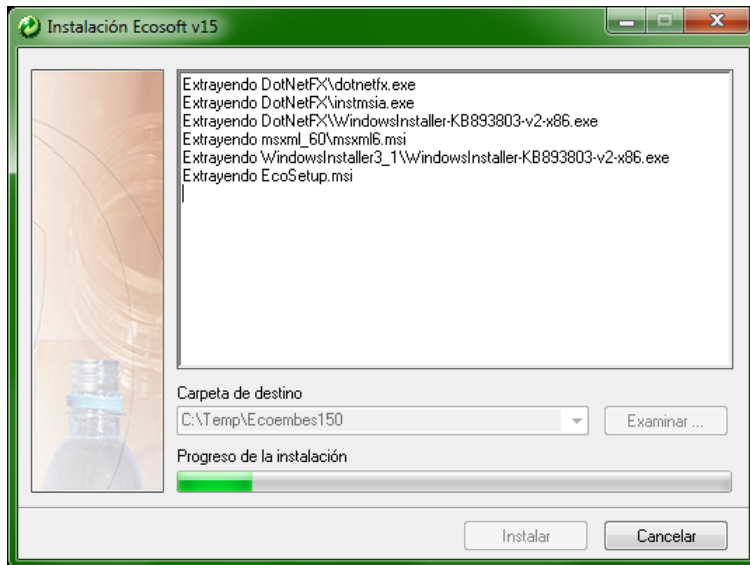

Imagen 1

El instalador descomprime los ficheros que necesita para realizar la instalación.

The installer unzips the files which it needs to carry out the installation.

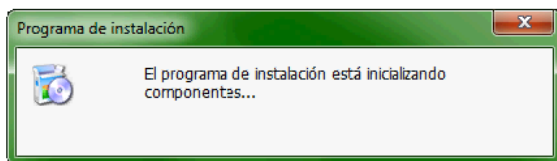

Imagen 2

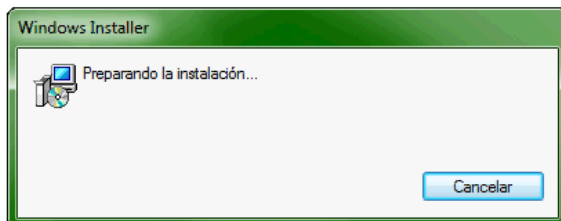

Imagen 3

On Windows XP operating systems the installer will verify that you have the following components installed:

- Windows Installer 3.1
- .NET Framework 2.0 (x 86)
- msxml60

If you do not have any of these components installed, the following screens will appear to confirm their installation.

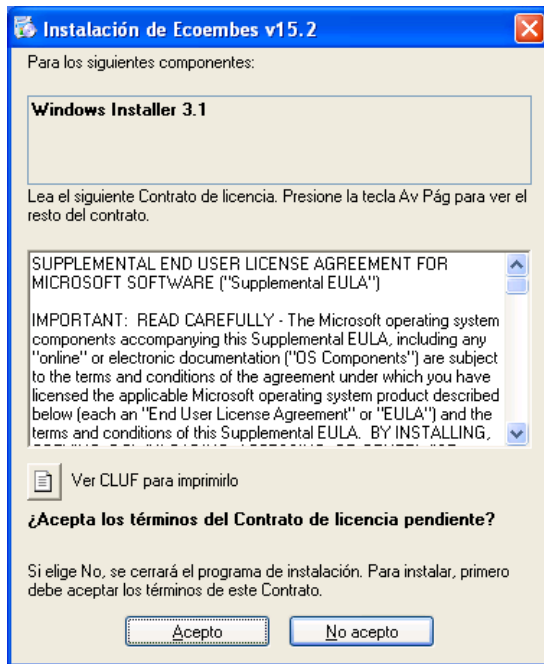

Imagen 4

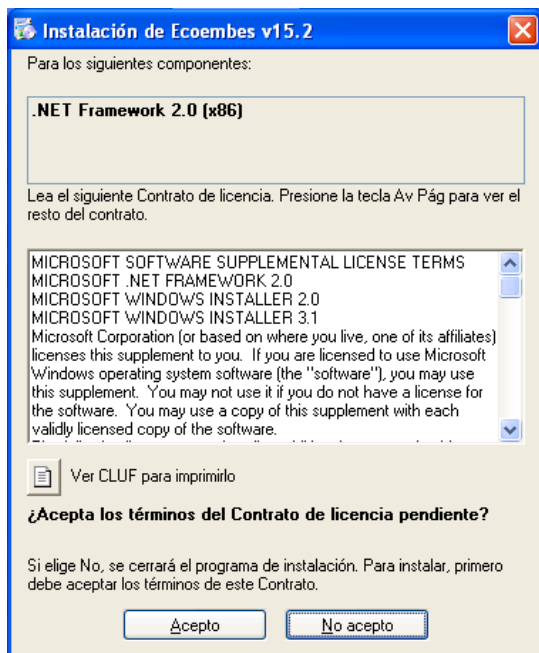

Imagen 5

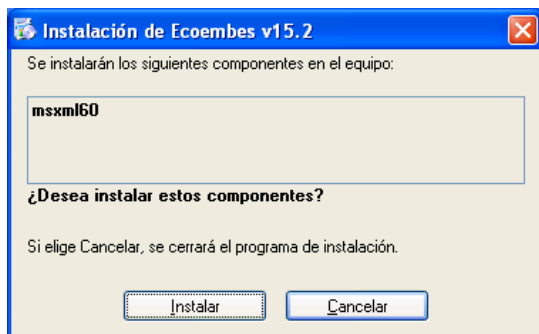

Imagen 6

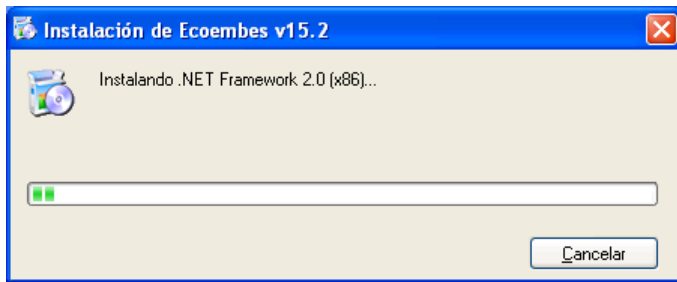

Imagen 7

Once the required components are installed the installation process begins; if a message appears asking you to restart your PC you are recommended to accept the message and continue with the installation process.

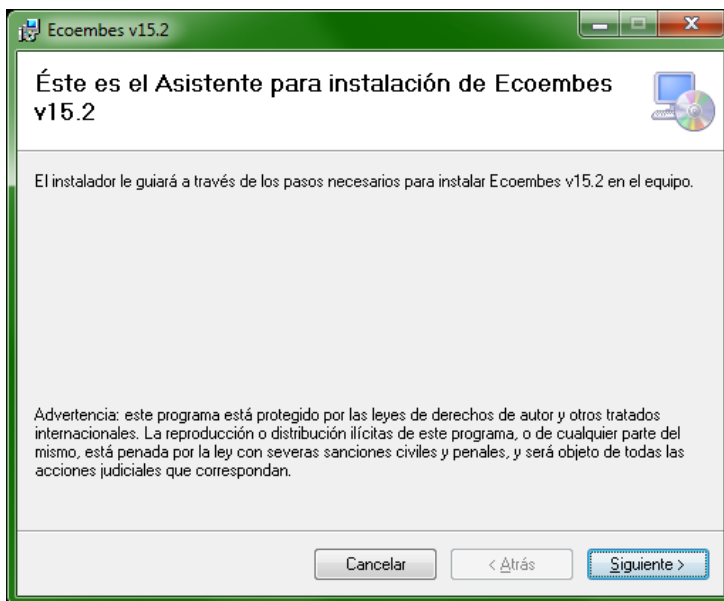

Imagen 8

The next screen informs you of the installation folder, which will store all the files needed for the execution of Ecosoft 15. Databases will not be stored in this folder.

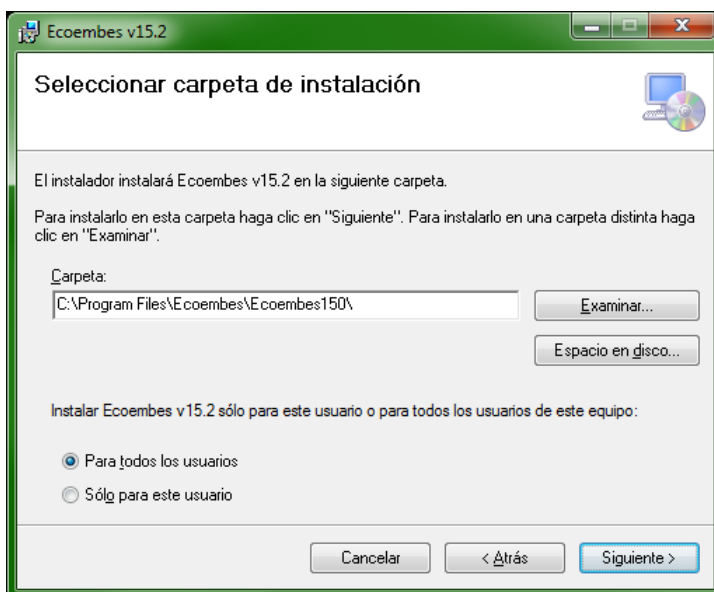

Imagen 9

A continuación se muestra la carpeta donde se instalará la aplicación.

Para cambiar la ubicación por defecto pulse el botón "Examinar...".

Por defecto la aplicación se instalará para <Todos los usuarios>.

Next the folder in which the application will be saved will be indicated.

To change the default location, use the "Search" option (or similar).

By default the application will be installed for "All users."

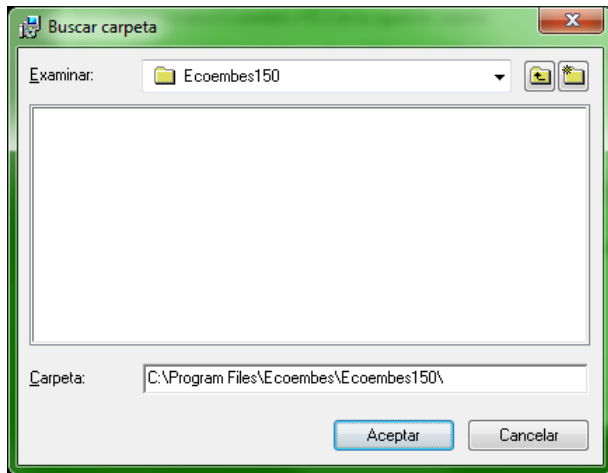

Imagen 10

Al pulsar el botón “Examinar...” se mostrará la siguiente pantalla, donde se podrá seleccionar una ubicación distinta. Seleccione la nueva ubicación y pulse el botón <Aceptar>.

When choosing the “Search” option (or similar) you will get the following screen, where you may select a different location. Choose the new location and click on the “Accept” icon.

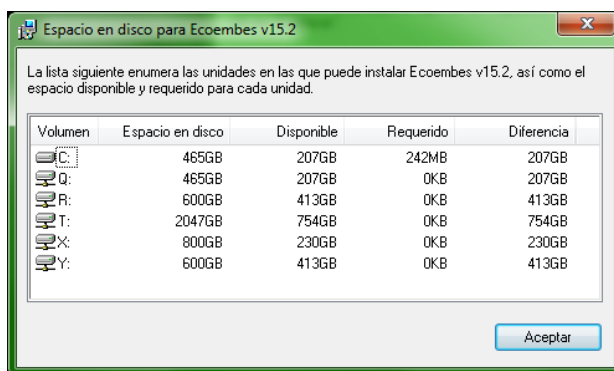

Imagen 11

Al pulsar el botón “Espacio en disco...” se mostrará una pantalla con la información del espacio disponible y requerido por el proceso de instalación.

When you choose the “Space on drive...” (or similar) option, you will get a screen with information indicating the space available and that required for the installation process.

To begin the installation click on “Next”

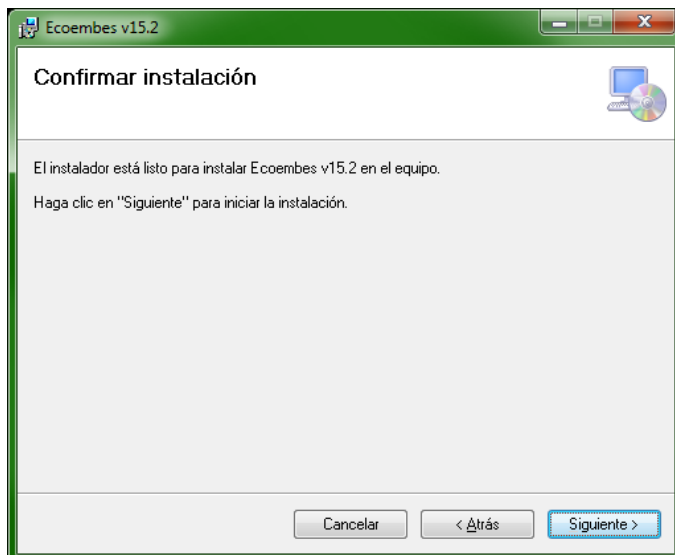

Imagen 12

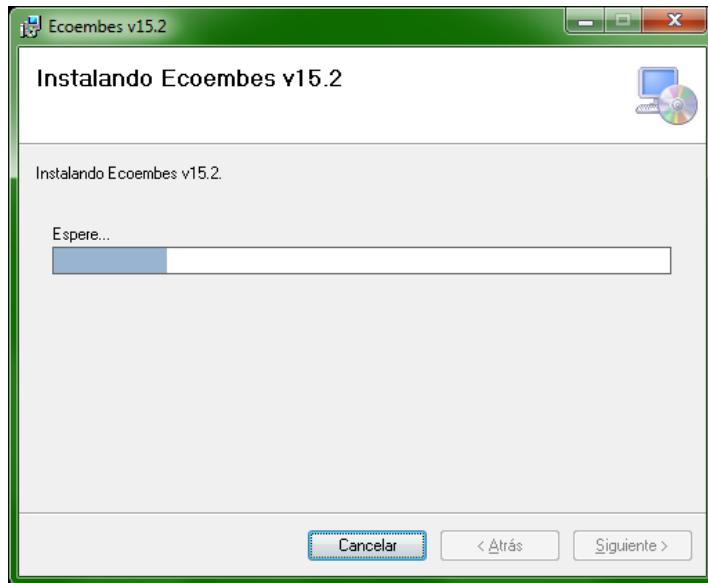

Imagen 13

A continuación le aparecerá la siguiente pantalla que le indica que la instalación ha comenzado y el tiempo (Aproximado) de espera.

Next you will see this screen indicating that the installation has begun and the approximate wait time.

The next screen informs you regarding the work folder in which the application's databases will be stored, along with the data the files generated with the declaration information:

Imagen 14

Para cambiar la ubicación por defecto del directorio de trabajo donde se almacenarán las BBDD pulse el botón → .

In order to the change the default location of the work directory where the DBs will be saved, click on the →  icon.

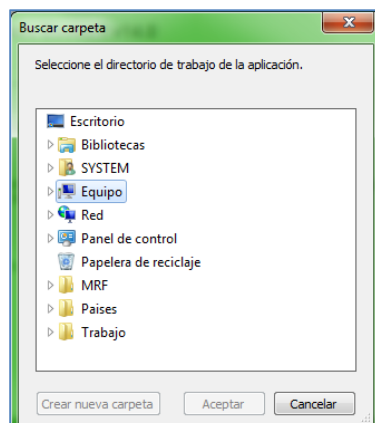

Imagen 15

Al pulsar el botón  se mostrará la siguiente pantalla, donde se podrá seleccionar una ubicación distinta. Seleccione la nueva ubicación y pulse el botón <Aceptar>.

If you select the  icon you will get the following screen, on which you may select a different location. Choose the new location and click on the "Accept" option.

If the program detects that the PC has Ecoembes' version 12. x or version 13. x or version 14. x installed, and finds any database upon which to update the Version 15.2, the following window will appear, with the three possible options:

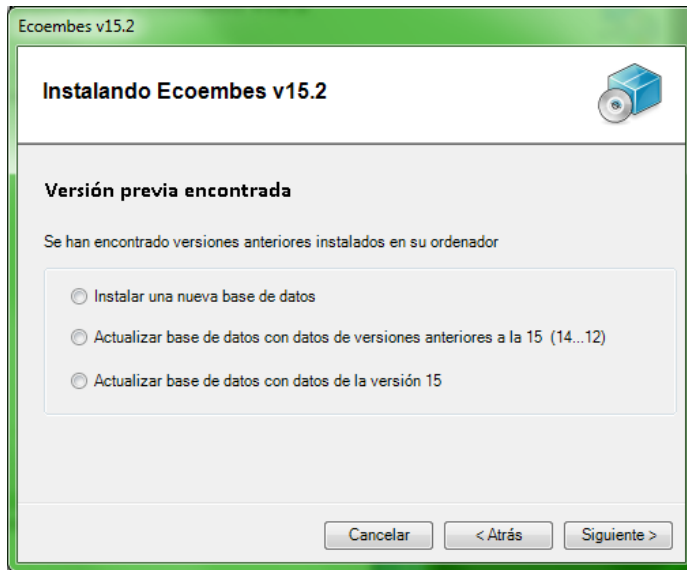

Imagen 16

1. Instalar una nueva base de datos.
2. Actualizar base de datos con datos de versiones anteriores a versión 15 (14,13,12).
3. Actualizar la base de datos de versión 15.x a versión 15.2, en caso de que la misma hubiera sufrido cambios. (En caso de que tuviese instalada otra versión de Ecosoft 15).

1. Install a new database
2. Update the database with data from versions prior to Version 15 (14,13,12).
3. Update the database from Version 15.x to Version 15.2, if it has undergone changes. (If you had another version of Ecosoft 15 installed)

1. – Install the Software for the first time.

If you wish to install the Ecoembalajes software for the first time, click on "Install a new database."

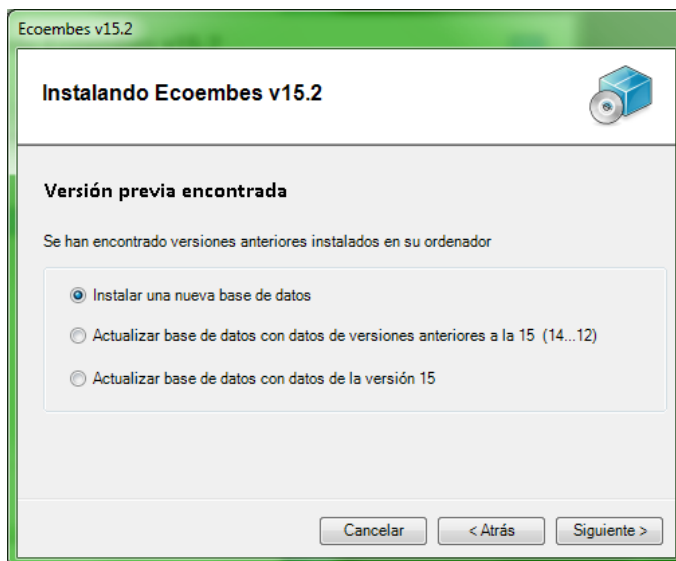

Imagen 1

A continuación pulse el Botón "Siguiente >" para continuar con la instalación.

Al seleccionar la opción <Instalar una nueva base de datos> se mostrará el siguiente mensaje de confirmación (imagen 2).

Next click on the "Next" icon to continue with the installation.

Upon selecting "Install a new database" you will get the following confirmation message (image 2).

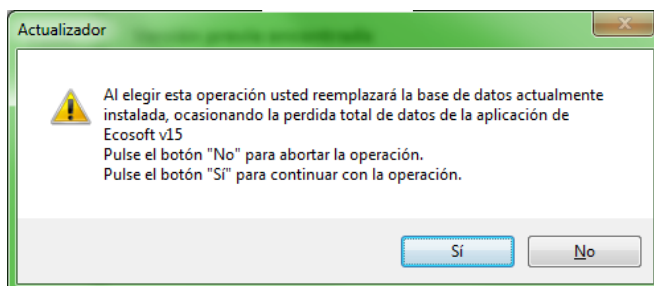

Imagen 2

Si elige la primera opción le saldrá un aviso indicando que perderá todos los datos de las posibles bases de datos que tuviese instaladas en su PC.

If you choose the first option you will get a warning message indicating that you will lose all the data from any databases you have installed on your PC.

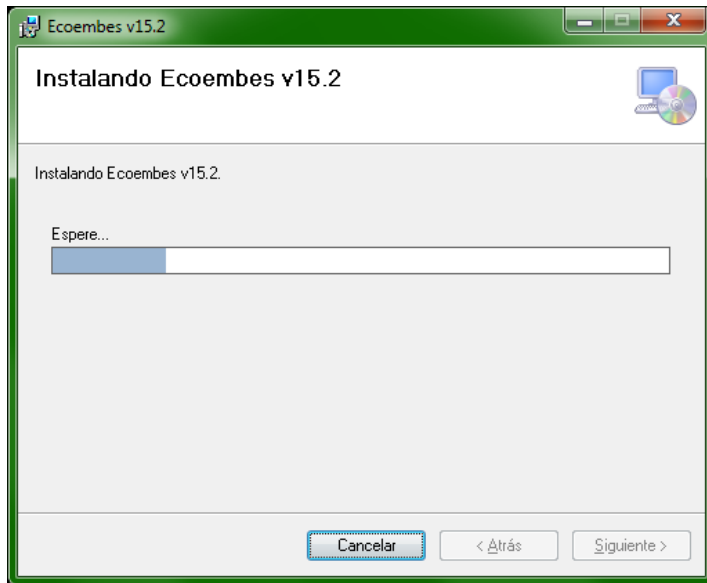

Imagen 3

A continuación le aparecerá la siguiente pantalla que le indica que la instalación ha comenzado y el tiempo (Aproximado) de espera.

Next you will see this screen indicating that the installation has begun and the (approximate) waiting time.

Once the installation has finished a screen will appear confirming the application's proper installation.

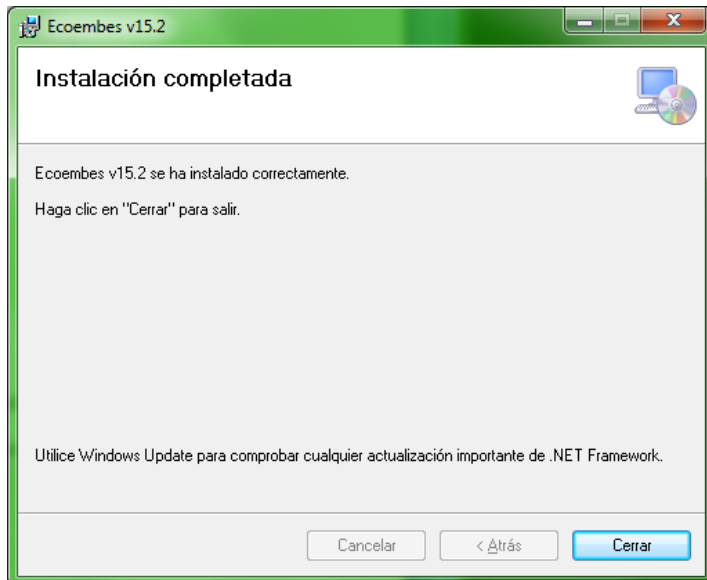

Imagen 4

Para finalizar la instalación pulse el botón de <Cerrar>.

In order to complete the installation, click on the "Close" option.

If you do not receive this screen, contact Ecoembalajes España, S.A.'s Customer Service Line. (902 28.10.28) in order to receive technical support.

If prompted with the option to restart your PC, you are recommended to do so.

2. Update previous versions of Ecoembalajes Software.

If you wish to update previous versions of Ecoembalajes software, click on the option "Update Database with data from versions prior to No. 15 (14 ,13,12) ."

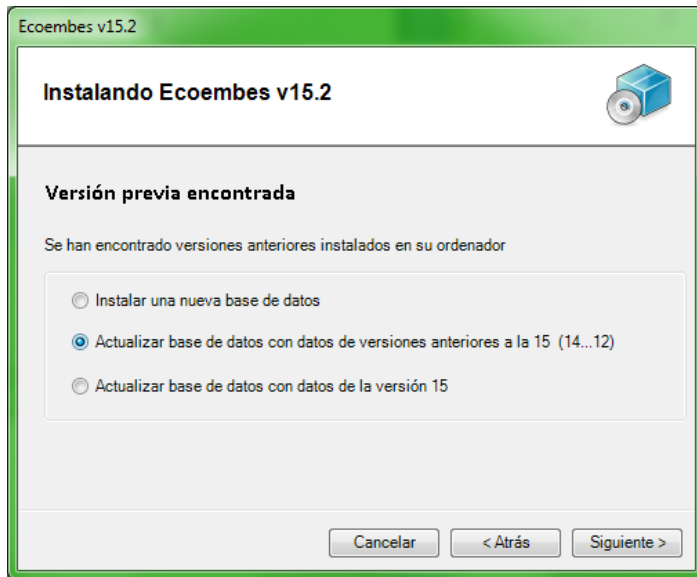

Imagen 1

A continuación pulse el Botón "Siguiete >" para continuar con la instalación.

Then click on the "Next" icon in order to continue with the installation.

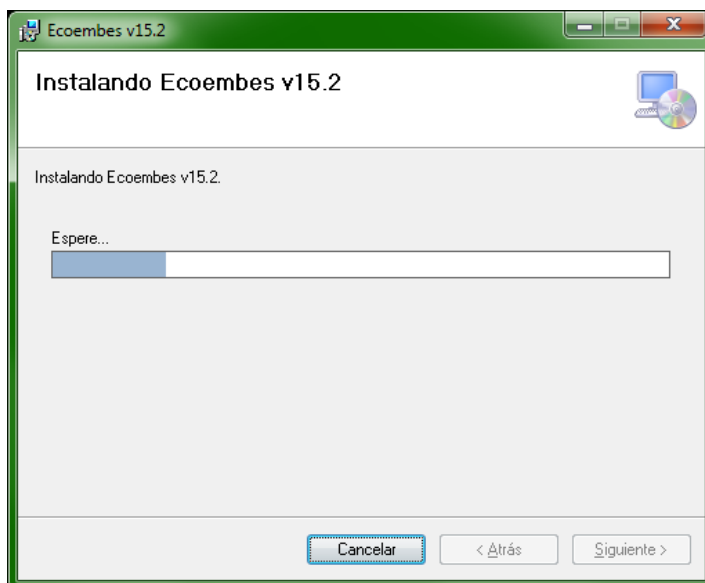

Imagen 2

El programa de instalación indica que se va a proceder a la copia de archivos. Espere hasta que finalice el proceso de actualización.

The installation program will indicate that it is going to copy the files. Wait until the updating process has been completed.

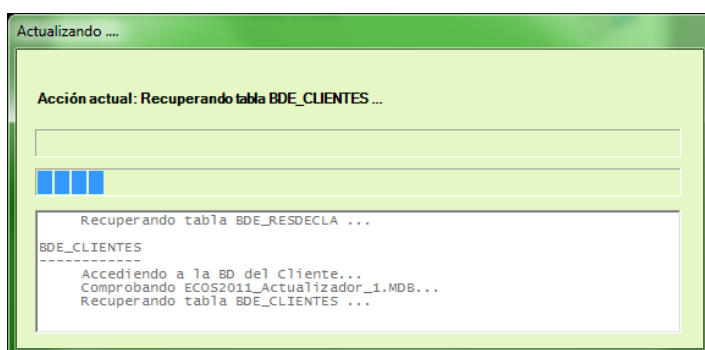

Imagen 3

Realiza la actualización de las Bases de Datos de versiones anteriores y registra todos los componentes en su PC.

Carry out the Database update of previous versions, and register all the components on your PC.

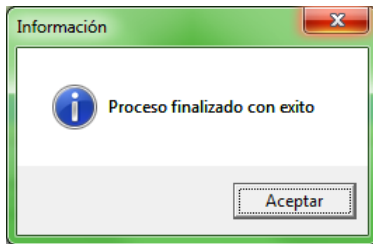

Imagen 4

Cuando finaliza la actualización muestra el siguiente mensaje, informando que la actualización se ha realizado correctamente.

When the update has completed the following message will appear, informing you that it has been carried out successfully.

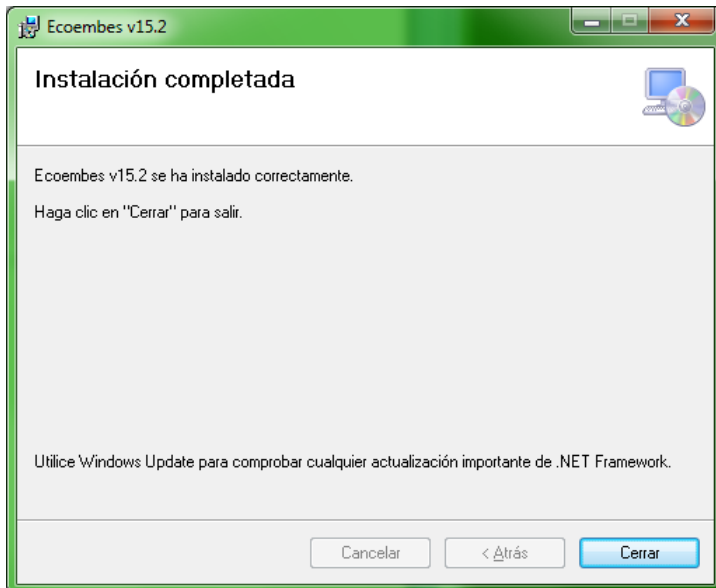

Imagen 5

Para finalizar la instalación pulse el botón de <Cerrar>.

In order to complete the installation, click on the "Close" icon.

3. – Update the database with data from Version 15

If you wish to update with data from Version 15 of Ecoembalajes' software, click on the option "Update Database with data from Version No. 15."

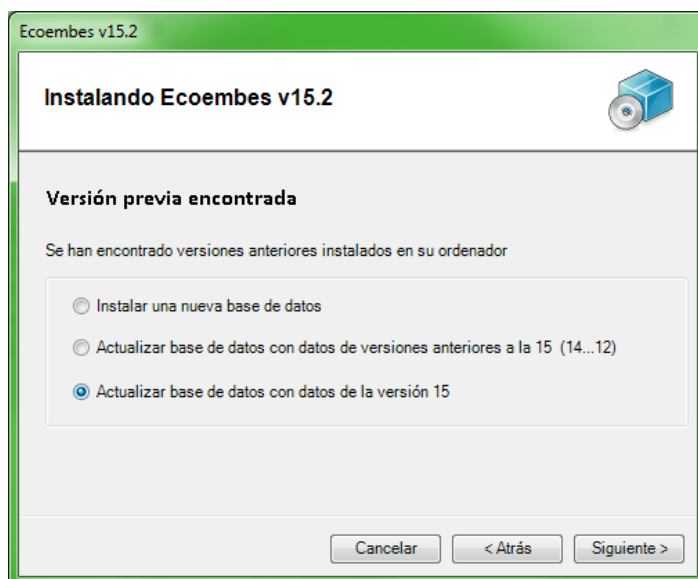

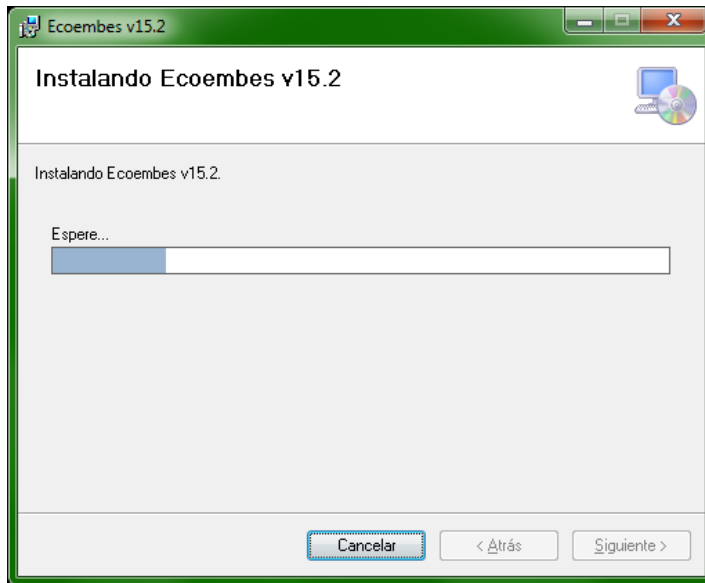

Imagen1

A continuación, pulse el Botón "Siguiete >" para continuar con la instalación.

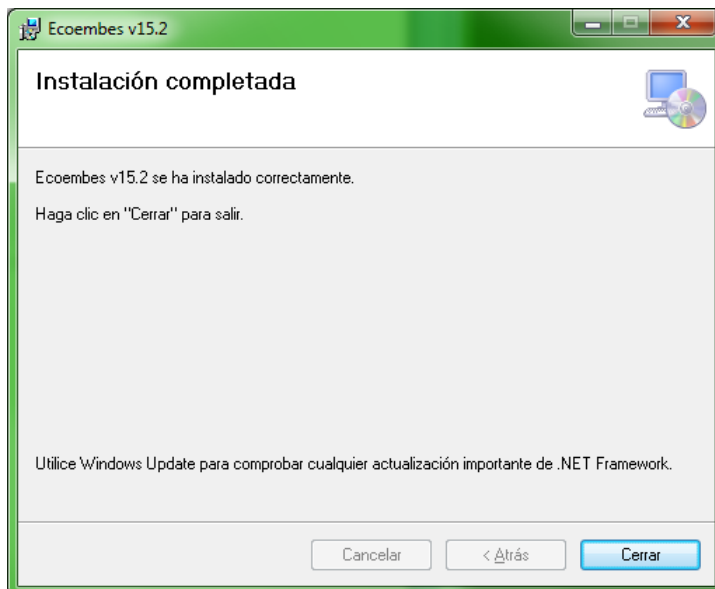

Click on the "Next" icon in order to continue with the installation.

*Imagen2*

El programa de instalación indica que se va a proceder a la copia de archivos. Espere hasta que finalice el proceso de actualización.

The installation program will indicate that it is going to copy the files. Wait until this updating process is completed.

Once the installation has finished a screen will appear confirming the application's proper installation.

*Imagen 3*

Para finalizar la instalación pulse el botón de <Cerrar>.

In order to complete the installation, click on the "Close" icon.

If you do not receive this screen, contact Ecoembalajes España, S.A.'s Customer Service Line. (902 28 10 28) in order to receive technical support.
If prompted with the option to restart your PC, it is recommended that you do so.

ANNEX

Other considerations

1. Functioning of the update.

During the update process a LOG file is created which stores each and every update operation completed on your Databases.

The application creates a copy of each original Database which it finds to Update before updating to Version 15.0 . This copy is saved in a folder named "Database (DB) to be Updated".

Unlike other versions, the database will accommodate as many clients as one wants.

2. Updateable Ecoembes version.

This default version will search for and update the prior versions of Ecoembes software. If there are previous versions, they will be updated to Version 15.2.

If you wish to perform this process manually, contact Ecoembes' Customer Service Line.

3. Elimination of previous versions

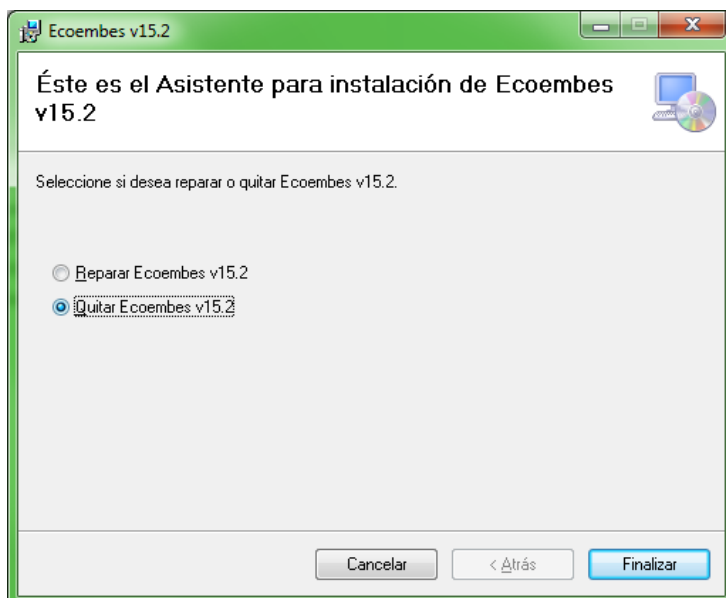

When upgrading from versions previous to 15.0, the update program will NOT delete from your PC the previous versions or the files associated with them.

4. Direct access to the application

During the installation or upgrade to version 15.2 a shortcut will be created on the Programs menu, and a shortcut will also be installed to the application on the Windows desktop.

5. Uninstalling the application

The Ecoembes 15.2 software can be uninstalled using the same CD. Simply select the "Eliminate" (or similar) option as shown in the following figure:

Then click on the "Finish" icon.

6. Customer Service Line

If you have any questions you may use the Ecoembes Customer Service Line (902 28 10 28).

7. Considerations when installing/running on Windows Vista

1. Install/run the application as the ADMINISTRATOR: Right click on the application install icon and select "Run as Administrator."
2. Once you have completed Point 1, a window will appear featuring two options:
 - a) Cancel: I am unaware of the origin of this program (or similar).
 - b) Allow: I trust this program. I know where it is from and I have used it before (or similar).

* To make possible the proper installation/running of the application you must selection option "B."
